EXPERIMENT 13

Design an infographic in Figma comparing mobile communication and mobile computing

between people or devices.

KEY FEATURES

- Wireless connectivity
- Mobility and network handoff
- Voice and data transmission

EVERYDAY EXAMPLES

- Cellular voice calls
- SMS text messages
- Messaging over mobile networks

information while moving.

KEY FEATURES

- Portable hardware
- Applications and operating systems
- Local processing and storage
- Optional wireless access

EVERYDAY EXAMPLES

- Editing a document on a tablet
- GPS navigation on a smartphone
- Inventory work on a handheld

HOW THEY CONNECT

Smartphones combine both.
They exchange information and run apps that process and use it.

Computing can work offline.
Many tasks, such as editing a saved document, need no network.

TAKEAWAY

Communication connects. Computing gets things done. Together, they support work and life on the move.
